

PERFORMANCE CONCRETE
5 - YEAR WARRANTY

PREMIUM CONCRETE & SUPERIOR CRAFTSMANSHIP THAT YOU CAN TRUST SINCE 1989

Since 1989, Cemstone DURA-CRETE® concrete has been manufactured using high-performance, quality ingredients, and it is installed by annually Certified Contractors following proven, time-tested guidelines of the American Concrete Institute and the Portland Cement Association's Cement Mason's Guide. Concrete is the most widely used material in the world. It is essential for commercial, residential and agricultural construction projects. In fact, concrete is essential in our modern day life-from interstate highways to airport runways to the sidewalks in your neighborhood. While concrete itself is a simple material, making beautiful concrete that lasts is a blend of art and science.

Performance and versatility: Cemstone DURA-CRETE® is an ideal choice for driveways as well as stamped and colored sidewalks, living spaces, pool decks and walkways. A list of annually Certified Contractors is provided on our web site www.cemstone.com for your convenience. Cemstone is not responsible for the acts, obligations or liabilities of these companies or services of any listed companies.

DURA-CRETE® IS YOUR BEST OPTION

DURA-CRETE® concrete combines top quality materials, concrete technology and systematic installation procedures to yield a finished product that not only withstands the punishment of our extreme climate but that also enhances the beauty and value of your property, now and for years to come.

COST EFFECTIVE

Over its expected service life, the operating cost of DURA-CRETE® remains considerably less than that of any other paving material. The initial investment in DURA-CRETE® is competitive with other pavements, the durability and low maintenance costs of DURA-CRETE® concrete save you money in the long run. Asphalt and unbonded pavers requires frequent and regular maintenance to continue to perform.

TROUBLE FREE

DURA-CRETE® resists water penetration, and it is designed and constructed to resist the effects of freezing and thawing. DURA-CRETE® concrete is long lasting and durable, scientifically engineered to withstand our harsh climate of extreme heat and bitter cold for years with a minimum of maintenance. *In fact, DURA-CRETE® actually gains strength as it ages!*

The DURA-CRETE® Ready-Mixed Concrete Program warranty assures your concrete surface from developing any surface defects resulting from inferior materials or workmanship. This includes the occurrence of coarse aggregate popouts, scaling, spalling or delamination. If a defect should appear within five years of the installation of your DURA-CRETE® concrete, the owner understands and agrees that the liability of Cemstone or the Certified Contractor is limited to the breaching party replacing or repairing the defective concrete. The decision as to whether the defective concrete will be repaired or replaced shall be made at the sole discretion of the breaching party.

WHATEVER YOU ENVISION...

CREATE IT WITH CONCRETE.

No matter how you envision your walkways, living space, driveway or home, you can bring the dream to life with concrete. Truly, your only limitation is imagination - and pesky thing called budget. Over its lifetime concrete saves you money and this long term performance makes DURA-CRETE® concrete a sustainable product. Concrete requires less maintenance, lasts longer and adds value to your property when compared to asphalt or pavers.

For durable, dependable, economical, low maintenance results, the choice is concrete. And the supplier to specify is CEMSTONE.
